EUROPEAN TRAJECTORIES
IN SPACE LAW

2007

Contents

| | |
|--|------------------|
| Acknowledgment | 9 |
| Préface | 11 |
| Foreword | 13 |
| Introduction | 15 |
| <i>Space law before 1960</i> | <i>15</i> |
| <i>Space law between 1960 and 2000</i> | <i>15</i> |
| <i>Space law as from 2000</i> | <i>16</i> |
| Part 1 – Space law before 1960 | 19 |
| <i>Chapter 1: First principles</i> | <i>21</i> |
| A. Several facts have sustained the idea of a separate international legal framework | 21 |
| B. Technical difference between a jet aircraft and a rocket | 22 |
| C. An early concept: space is not a location but a source of activities | 22 |
| D. Space law: a breakthrough thanks to the regulation of space activities | 22 |
| E. Links between air law and space law | 23 |
| <i>Chapter 2: The principle of liberty of space extended to celestial bodies</i> | <i>24</i> |
| A. Distinction between liberty and internationalisation | 24 |
| B. Consolidation of the principle of liberty of access to space by two other conventions | 25 |
| C. Conclusion | 26 |
| <i>Chapter 3: Military grounds for civilian developments</i> | <i>27</i> |
| <i>Chapter 4: Space law as a branch of international law</i> | <i>28</i> |
| Part 2 – Space law between 1960 and 2000 | 29 |
| <i>Chapter 1: The Outer Space Treaty (OST) (1967)</i> | <i>31</i> |
| <i>Chapter 2: The Rescue Agreement (1968)</i> | <i>34</i> |
| <i>Chapter 3: The Liability Convention (1972)</i> | <i>36</i> |
| A. Concepts (Articles I to V) | 36 |
| B. The applicable law (Article XII) | 37 |

| | |
|--|-----------|
| C. The mechanism for settling under the Convention (Articles VI–X) | 38 |
| D. Dispute settlement (Article XIX) | 38 |
| Chapter 4: The Convention on Registration of Objects launched into Outer Space (1974) | 41 |
| A. Concept | 41 |
| B. The mechanism of registry | 41 |
| Chapter 5: Agreement Governing the Activities of States on the Moon and other Celestial Bodies (1979) | 44 |
| A. Concepts | 44 |
| B. Activities on the Moon | 45 |
| Chapter 6: The Conventions of the European Space Agency (ESA) (1975–1980) | 47 |
| A. Origin of the Convention | 47 |
| B. The concept of the ESA | 48 |
| C. Comments on the substance | 49 |
| D. Comments on the formal aspects | 52 |
| Chapter 7: The International Telecommunication Union Convention (1973) | 54 |
| A. Introduction | 54 |
| B. Historical overview | 54 |
| C. The concept of the ITU | 56 |
| I. Legal framework | 56 |
| II. Functioning of the ITU | 57 |
| III. Authority of the ITU | 59 |
| Chapter 8: The intergovernmental agreement (IGA) on the International Space Station (ISS) (1988) | 60 |
| Chapter 9: Commercial development plans in space related to the ISS | 63 |
| A. Historical background | 63 |
| B. An approach for ISS commercialisation | 64 |
| C. A commercial development plan for the civil International Space Station (ISS) proposed by NASA (1998) | 66 |
| I. Definitions | 66 |
| II. The US concept | 67 |
| III. A launch does not mean an export, a re-entry not an import | 68 |
| IV. The procurement of commercial space transportation services | 68 |
| Chapter 10: Space-related resolutions of the United Nations General Assembly (UNGA) | 70 |
| Chapter 11: The particular problem of space debris | 73 |
| A. Technicalities | 73 |
| B. Definitions | 74 |
| C. Existing space law potentially applicable to space debris | 75 |

| | |
|--|------------|
| Chapter 12: The multiple uses of satellites | 77 |
| A. Telecommunications | 77 |
| B. Satellite navigation | 78 |
| C. Remote sensing | 79 |
| I. Applications in their historical development | 79 |
| II. International law governing remote sensing | 80 |
| III. The concept of remote sensing | 81 |
| D. Solar power satellites (SPS) | 84 |
| I. Definition of solar energy | 84 |
| II. Function of solar power satellites | 84 |
| III. Legal implications | 84 |
| E. Nuclear power sources (NPS) | 85 |
| Chapter 13: Galileo, the European satellite positioning project | 86 |
| A. History | 86 |
| B. Concept of Galileo | 86 |
| C. Technicalities around Galileo | 87 |
| D. The potential of applications for Galileo | 87 |
| E. Political issues | 88 |
| Chapter 14: Industrial law in space applications | 89 |
| A. Definitions | 89 |
| B. Intellectual property rights | 89 |
| Chapter 15: Insurance of space activities | 92 |
| A. History | 92 |
| B. Types of insurance | 92 |
| C. Definitions | 93 |
| Chapter 16: Dispute resolution — jurisprudence | 95 |
| A. Concept | 95 |
| B. Case law | 95 |
| C. The settlements of disputes | 98 |
| Part 3 – Space challenges faced by Europe from a legal perspective (2000–) | 101 |
| Chapter 1: Take-off of a strategic vision for space in Europe | 104 |
| A. History | 104 |
| B. The reflection time | 105 |
| Chapter 2: Efforts to achieve institutional convergence between the European Commission and the ESA | 107 |
| A. The Bildt-Peyrelevalde-Sp ath report and its influence | 107 |
| B. The Joint Task Force EC/ESA (2001) | 109 |

| | | |
|---|---|------------|
| C. | The EC/ESA framework paper | 110 |
| I. | Purpose of the cooperation | 110 |
| II. | Joint initiatives with their restrictions | 110 |
| III. | Duration of the agreement | 111 |
| D. | The future of the EU/ESA relationship | 112 |
| I. | The actual model of cooperation, through partnership, on the one hand | 112 |
| II. | The integration model, on the other hand | 112 |
| Chapter 3: The Green Paper initiative (21 January 2003) followed by the White Paper (11 November 2003) | | 114 |
| A. | The Green Paper (21 January 2003) | 114 |
| I. | Introduction | 114 |
| II. | Content of the Green Paper | 114 |
| III. | The ESA's similar programme for scientific users | 116 |
| B. | The White Paper (11 November 2003) | 117 |
| I. | Introduction | 117 |
| II. | Content of the White Paper | 120 |
| Chapter 4: The setting of a new treaty framework: the European Convention | | 127 |
| A. | References to space | 127 |
| I. | The basic reference to space lied in Article 1-14, al. 3: | 127 |
| II. | The second reference | 129 |
| III. | There was an implicit reference to space also in Article 41-3-2 | 129 |
| Chapter 5: Towards a European Defence Agency | | 131 |
| A. | Introduction | 131 |
| B. | Space, a strategic asset for Europe | 132 |
| C. | A need for a strong and coherent industry | 133 |
| Chapter 6: The European military-industrial complex | | 137 |
| A. | Introduction | 137 |
| B. | The French-German-British-Spanish-Italian regrouping (July 2000): EADS | 137 |
| C. | Fragmentation of the European defence market | 139 |
| D. | US–EU competition in defence contracts | 139 |
| Chapter 7: Galileo and GNSS challenges during the 21st century | | 141 |
| A. | The Galileo Joint Undertaking | 141 |
| I. | Introduction to the development phase — historical background | 141 |
| II. | Motivation for the creation of the Galileo Joint Undertaking | 142 |
| III. | Legal bases for the Galileo Joint Undertaking | 143 |
| IV. | Introduction to the operational phase | 143 |
| V. | System potentialities | 144 |
| B. | Strategic nature of the European satellite radio-navigation programmes and establishment of structures for its management: the GNSS supervisory authority | 145 |

| | |
|---|------------|
| C. The EU–US dispute and compromise | 150 |
| D. Other legal aspects to watch in the future implementation of GNSS and Galileo | 151 |
| Chapter 8: EU cooperation with third countries on space issues | 153 |
| A. General scope | 153 |
| B. The European dimension of cooperation in space affairs | 154 |
| I. Cooperation with Russia | 154 |
| II. Cooperation with Ukraine | 159 |
| III. Cooperation with other non-EU countries of Europe | 164 |
| C. The extra-European dimension of cooperation in space affairs | 165 |
| I. The special issue of space cooperation between the People's Republic of China and the European Union | 165 |
| II. Cooperation with India | 166 |
| III. Cooperation with Brazil | 166 |
| IV. Cooperation with Japan | 167 |
| V. Cooperation with Canada | 167 |
| Chapter 9: A need to clarify the role assigned to ISS | 169 |
| A. The need to reconsider the operational bases for the ISS | 169 |
| B. The growing importance of Europe in the scientific area | 170 |
| C. International reflection on the future of ISS | 171 |
| Chapter 10: Space travel in a privatisation perspective | 172 |
| A. Feasibility studies from the 1990s | 172 |
| B. First legal framework for space tourism | 173 |
| C. Space privatisation principles | 174 |
| D. Aviation regulation, a model for space carriage? | 176 |
| E. Death and injury of passengers — damage to payload | 177 |
| F. Damage to cargo (e.g. minerals, rare stones) | 177 |
| G. The problem of insuring a space passenger | 178 |
| Chapter 11: Developments in the International Telecommunications Union (ITU) | 180 |
| A. Historical background | 180 |
| I. First commitments in international telecommunications | 180 |
| II. Reference paper | 180 |
| III. The new negotiations | 183 |
| B. American dominance | 183 |
| C. Space segment requirements | 185 |
| D. Three different approaches: the USA, Japan, the ESA... and newcomers appear | 186 |
| I. The US (NASA) perspective | 186 |
| II. The Japanese perspective | 186 |
| III. The European (ESA) perspective | 186 |
| IV. Other international developments | 187 |

| | |
|--|------------|
| Chapter 12: Multilateral solutions against increasing environmental damage originating in space | 188 |
| A. The environmental problem globally: from Rio to Kyoto | 188 |
| B. Significance of the Kyoto Climate Protocol | 188 |
| C. The environmental liability with regards to the prevention and remedying of environmental damage | 191 |
| D. Protection of the environment, a key policy element for the EU | 191 |
| E. Implementing GMES | 193 |
| F. Pollution of the outer space environment | 194 |
| I. Debris | 194 |
| II. Emissions | 194 |
| III. Contrails | 194 |
| G. Kyoto celebrations | 195 |
| H. Sustainable spatial development | 197 |
| I. The European Environment Agency | 197 |
| II. Europe's Meteorological Satellite Organisation: Eumetsat | 200 |
| III. DG Research's Space Conferences and Exhibitions in Brussels (12–20 February 2005) | 201 |
| IV. Recent analysis of the ITU environment | 201 |
| I. Consequences for ITU | 202 |
| J. ITU partnership with Inmarsat in support of the least developed countries | 203 |
| K. EU legislation in telecommunication | 204 |
| I. The 'satellite directive' | 205 |
| II. The 'full competition directive' | 205 |
| III. The 'licensing directive' | 206 |
| L. What has been done at an international level to facilitate the obtaining of necessary authorisations? | 206 |
| Chapter 13: Future insurance of space activities | 208 |
| A. Insurance requirements for space carriers and space travel operators from the EU | 208 |
| B. The space insurance market | 215 |
| I. Recent evolution in the space insurance market | 215 |
| II. Personal risks to be covered | 217 |
| C. Linkage with the aerospace industry | 219 |
| Chapter 14: Space competition, claims and dispute resolution | 220 |
| A. Bases in European competition law | 220 |
| B. Which solutions could be envisaged? | 222 |
| C. The problem of insuring humans in space | 223 |
| D. Recent consolidation in space markets and industry structure | 226 |
| I. Market situation of the 'big three' | 226 |
| II. Restructuring in the satellite building and launcher industries | 227 |

| | | |
|------|--|------------|
| E. | Judicial differentiation between the satellite market and the market for launch services | 229 |
| I. | Case No COMP/M.1879 — Boeing/Hughes — October 2000 | 229 |
| II. | Case No COMP/M.1636 — MMS/DASA/Astrium — March 2000 | 230 |
| F. | Questions about space transport emergence | 233 |
| I. | What will happen when space transport comes in? | 233 |
| II. | Will space transport one day be part of the common transport policy? | 234 |
| III. | Are bilateral space services agreements possible? | 234 |
| IV. | What is interesting about the Court's decision? | 235 |
| G. | Liability regarding space services, necessarily subject to be limited | 235 |
| H. | Liability regarding exploitation of space resources | 236 |
| I. | Dispute settlement | 237 |
| | Chapter 15: Space and security — concentration in the aerospace industry | 238 |
| A. | Introduction | 238 |
| B. | Legal interpretation of defence procurement rules in the EU | 243 |
| I. | Background: Article 296 of the EC Treaty | 243 |
| II. | The need for a European independent, common defence procurement | 243 |
| C. | EU procurement rules in relation to space policy | 244 |
| I. | What will be the defence applications of Europe's space effort? | 244 |
| II. | What is the future for EU-US space cooperation? | 245 |
| D. | De facto competitiveness in the aerospace industry depends on military orders | 246 |
| | Epilogue | 249 |
| | Scientific advance and EU space policy | 249 |
| | Annexes | 257 |
| | <i>Acronyms</i> | 259 |
| | <i>Bibliography</i> | 263 |
| | <i>ITU historical review</i> | 273 |
| | <i>Extracts from the radio regulations</i> | 277 |
| | <i>Framework agreement between the European Community and the European Space Agency</i> | 279 |
| | <i>Status of international agreements relating to activities in outer space as at 1 January 2006</i> | 287 |
| A. | United Nations Treaties | 287 |
| B. | Other Agreements | 289 |
| C. | International status | 293 |
| | <i>Space law instruments and regulations</i> | 303 |

European Commission

European trajectories in space law

Luxembourg: Office for Official Publications of the European Communities

2008 – xxxiv, 337 pp. – 15,8 x 24 cm

ISBN 92-78-40348-2

Price (excluding VAT) in Luxembourg: 65 EUR
